We are multi-disciplinary and membership is open to all. We have won four national awards:

1. National Health and Care Award for Workforce Innovation in June 2022

2. HSJ Awards: NHS Race Equality Award in November 2021

3. Maker's Academy Women in Software 2021 ChangeMakers Award in September 2021

4. TechWomen 100 Network of the Year Award in 2020

The Shuri Digital Fellowship

Coaching

This is a powerful tool to help people unlock their full potential to achieve personal and professional success, overcome barriers and achieve clarity and direction. We offer 1:1 coaching sessions with accredited coaches, preferably (but not restricted to) with a BAME, health or social care or digital backgrounds.

Tailored educational events

To support continuing professional development: This included sessions with successful role models in digital health, health and social care, practical workshops on job applications, interview skills, digital roles, technological skills, digital advances and developments.

Peer support

a community of practice was established to enable our Fellows to network, share their knowledge, contribution to digital programmes and projects and support each other.

Shadowing opportunities

The Shuri Network offers opportunities to shadow leaders online or in person, including CIOs, CNIOs, tech startup founders, CCIOs, product developers and leading international companies such as Cerner. The benefits include gaining insight into different roles, making connections and exploring new career options.

Opportunities to speak at national and international conferences and events

Discussion

1. What aspects of the Digital Fellowship programme would be most valuable to you, in terms of your professional digital, data and technology development and career advancement in this space?
2. How could you support the Digital Fellowship programme in your organisation?
